

Specifications

Queen Size

Safe is composed of two 30" x 78" x 14" sections bolted together from the inside

Safe body is made of 10 guage steel and doors are made of 1/4" steel

The doors are 18" x 66" for easy access

There are two hinges on each door for easy removal

There is a solid 3/4" continuous hinge side locking inside to prevent the safe from being compromised if the hinges are cut off.

The safe doors are assisted by a gas spring for easy open and closure

The doors have a heat sensitive expanding fire gasket to seal the door edges and protect from fire and water damage.

Each door is locked in place by flush matching Mul-t-lock high security locks with special keys

Safe is completely felt lined

Safe is completely powder coated

Weight 1300 pounds (two 650 pound sections bolted together)

Dimensions 78" long x 60" wide x 14" depth

Safe is self supporting and compatable with any standard bed frame

Safe will hold comfortably 35 rifles and 70 hand guns

Optional screw in casters are available for easy moving

Safe includes eight 12" threaded adjustable legs
